

Week 4 Unit 2: Updating and Manipulating Data

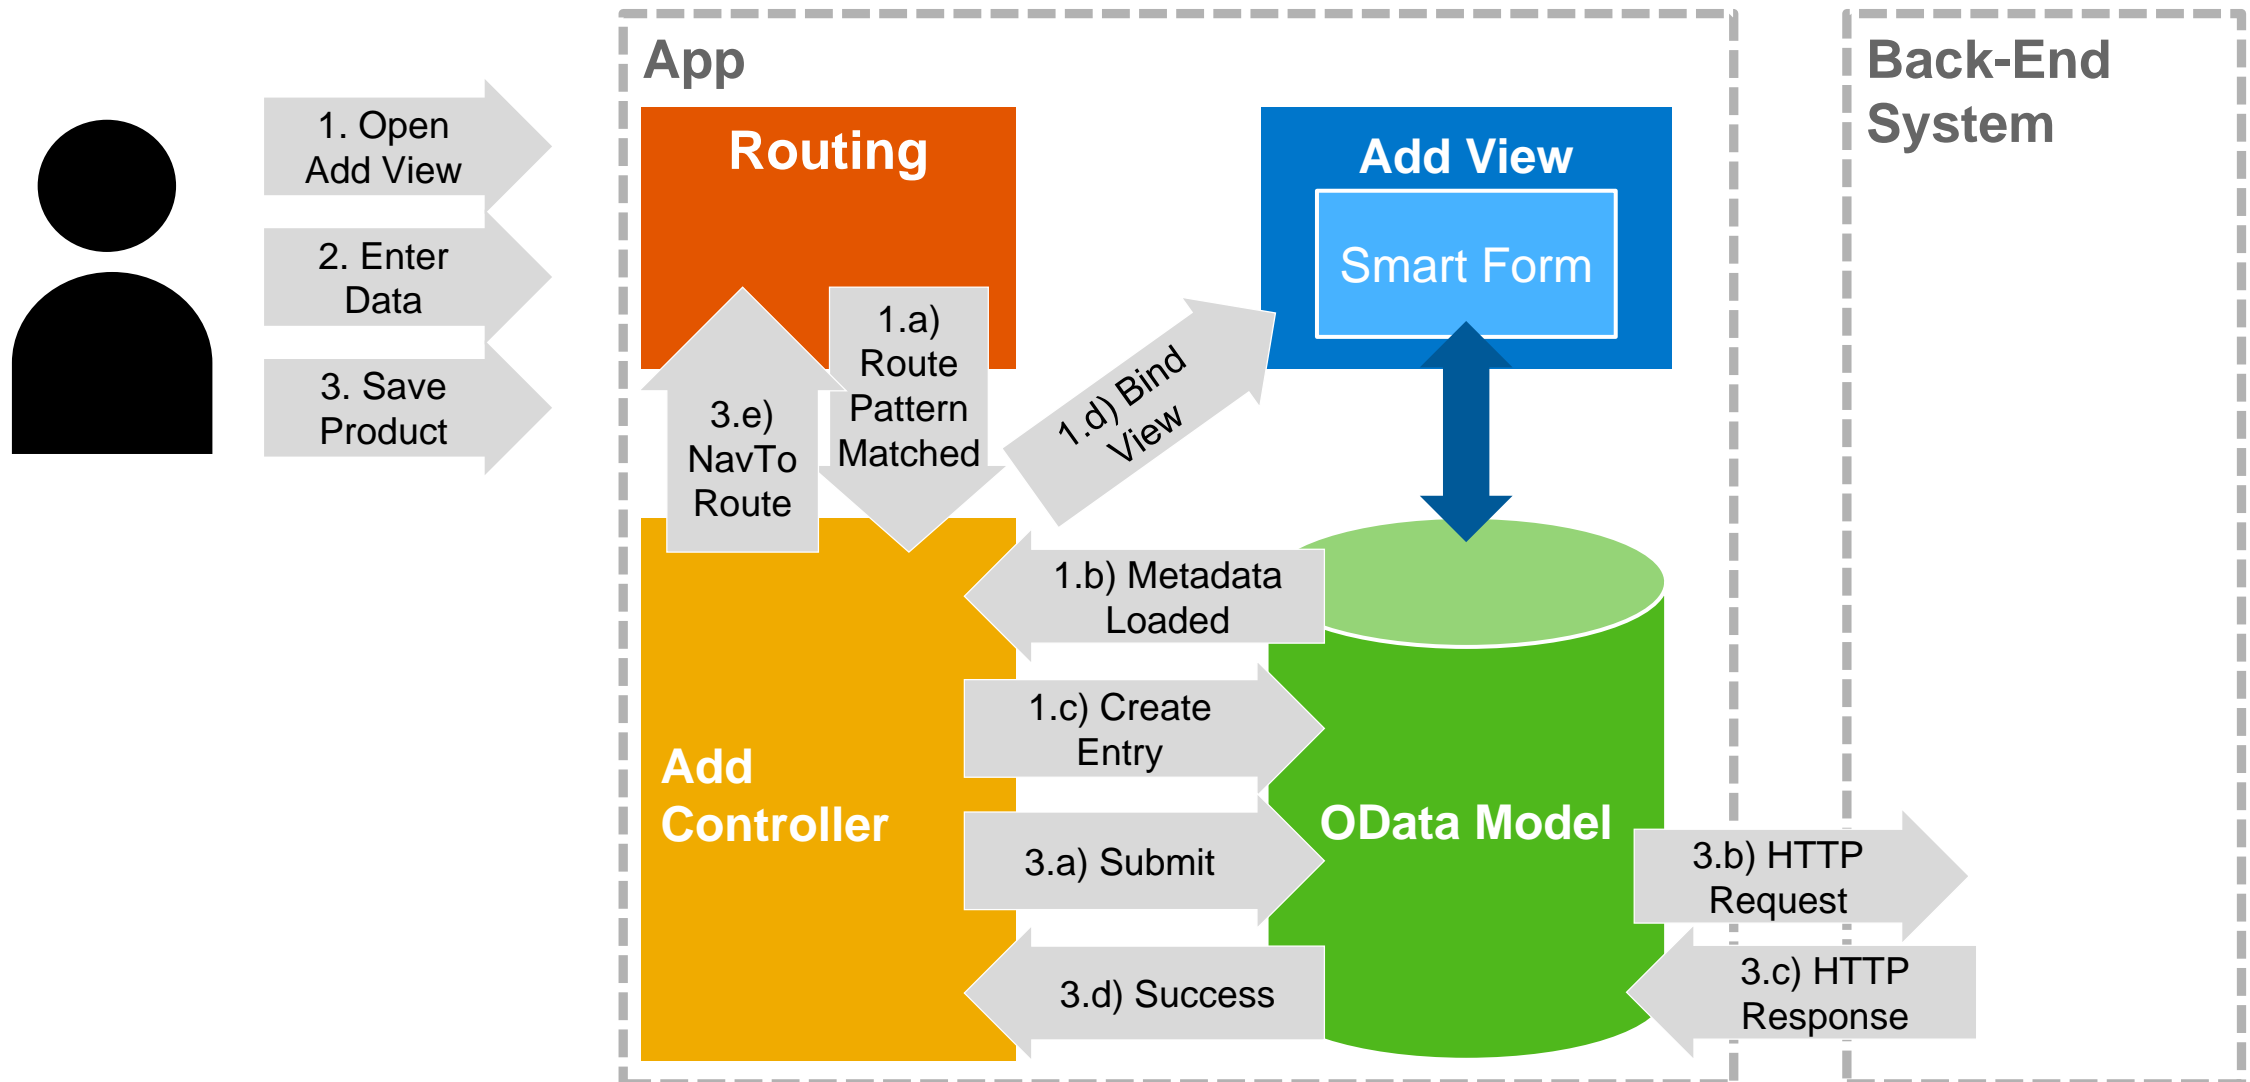

Updating and Manipulating Data

User interaction steps

Updating and Manipulating Data

Controller logic

Updating and Manipulating Data

Beyond this session

This unit only shows the first steps in setting up the complete update scenario. The following requirements have been omitted:

- **Busy Indication:** The view needs to be set to busy while the server is processing the request
- **Error Handling:** Specific error messages for create and update
- **Input Validation:** The data needs to be validated and the resulting messages displayed to the user
- **Value Help:** The user needs assistance when entering the data
- **Data Loss Confirmation:** If users try to leave the screen without saving their data, they should be prompted to confirm the loss of data

Thank you
